An Intensive Workshop on Evolving Strategies in Hepatitis C Management

12:00 PM  Welcome and Participant Introductions

12:15 PM  What Clinicians Should Know About Hepatitis C Virus
           Oluwaseun O. Falade-Nwulia, MD, MPH
           This presentation will provide an overview of hepatitis C virus (HCV) and will include discussions on screening, testing, state-of-the-art treatment for HCV-infection, and future directions. In addition, this presentation will include an overview of the new drugs and what has happened in the last year.

12:45 PM  Hepatology for the Nonhepatologist
           Arthur Y. Kim, MD
           This presentation will provide the nonhepatologist with the basics on how to manage HCV infection in patients with liver-related complications. This presentation will provide attendees with a basic overview of the liver and will include discussions on assessing fibrosis stage.

Interactive Case-Based Presentations and Audience Discussion

1:30 PM  Break

1:45 PM  Management of HCV Genotype 1 and 4 Treatment-Naive and Treatment-Experienced Patients
           Arthur Y. Kim, MD
           This presentation will discuss the strategies for treating treatment-naive and treatment-experienced patients who have HCV genotypes 1 and 4. This presentation will also include discussions on the role of staging and why genotypes matter.

2:30 PM  Treatment of HIV/HCV Coinfection and the Management of Drug-Drug Interactions
           Charles W. Flexner, MD
           This presentation will discuss the treatment and management of patients with HIV/HCV coinfection, including the effective management of drug-drug interactions between antiretroviral and direct-acting antiviral agents.

3:15 PM  Break

3:30 PM  Management of HCV Genotype 2 and 3 Treatment-Naive and Treatment-Experienced Patients
           Oluwaseun O. Falade-Nwulia, MD, MPH
           This presentation will discuss the strategies for treating treatment-naive and treatment-experienced patients who have HCV genotypes 2 and 3.

4:15 PM  Treatment of HCV-Infection in Special Patient Populations
           Oluwaseun O. Falade-Nwulia, MD, MPH
           This presentation will focus on HCV infection in injection drug users.

5:00 PM  Closing Remarks
