

International Antiviral Society–USA

Mission

The mission of the International Antiviral Society–USA (IAS–USA) is to improve the prevention, treatment, care, and quality of life for people with or at risk of HIV or other viral infections and their associated health conditions through high-quality, relevant, balanced, and needs-oriented education and information for practitioners and scientists who are actively involved in medical care and research.

Accreditation Statement

The IAS–USA is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Board of Directors

Nonstaff board members serve in a volunteer capacity and are not compensated for their roles in oversight and governance of the organization. As part of its duties, the board oversees the needs assessment, design, development, and evaluation of all educational programs. Visit www.iasusa.org/about/ias-usa-board-of-directors/ for a list of Board of Directors members.

Improving the Management of HIV Disease®: Advanced CME Courses in HIV Pathogenesis, Antiretrovirals, and Other Selected Issues in HIV Disease Management (Virtual in 2020)

These one-day courses are designed for HIV specialists who are actively involved in HIV disease management or research. The virtual courses are half-day updates that focus on the key issues clinicians are likely facing. Nationally and internationally recognized faculty provide advanced-level presentations with balanced, timely, scientifically rigorous, and clinically relevant information about HIV disease management. Visit www.iasusa.org/activities/live-courses/hiv-courses/ for more information on upcoming on-demand CME courses.

Webinars

The IAS–USA offers state-of-the-art webinars on the evolving challenges of managing HIV disease as part of a nationwide continuing medical education (CME) effort for physicians. They are led by nationally and internationally recognized faculty. Each webinar lasts 75 to 90 minutes and provide continuing education credits. Visit www.iasusa.org/activities/webinars/upcoming-webinars/ for upcoming webinars. On-demand webinars

offer CME credit for a year at www.iasusa.org/activities/webinars/on-demand-webinars/.

Webinar topics and presenters are identified by the *Cases on the Web Board (COW)* Board, a select group of experts in the management of HIV and other viral infections. Visit www.iasusa.org/activities/cases-on-the-web/about-cows/cow-webinars-editorial-board/ for a list of COW Board members.

Conference on Retroviruses and Opportunistic Infections

The IAS–USA partners with the Conference on Retroviruses and Opportunistic Infections (CROI) Foundation to sponsor CROI, the most important HIV research conference worldwide. Webcasts, electronic posters, and abstracts from CROI 2014 to 2020 are available at www.CROIconference.org.

Ryan White HIV/AIDS Program CLINICAL CONFERENCE

The Ryan White HIV/AIDS Program CLINICAL CONFERENCE provides state-of-the-art updates on research, care, and treatment issues in the medical management of HIV infection for experienced HIV physicians, nurse practitioners, and physician assistants in Ryan White HIV/AIDS Program (RWHAP)-funded clinics and programs.

The CLINICAL CONFERENCE is planned with and supported by the HIV/AIDS Bureau, Health Resources and Services Administration of the US Department of Health and Human Services (HRSA) and is sponsored and organized by the IAS-USA. This conference is coordinated through the RWHAP AIDS Education and Training Centers (AETC) clinician training network. Visit www.iasusa.org/events/rwcc2020/ for more information and to access resources from the 2020 CLINICAL CONFERENCE.

Topics in Antiviral Medicine™

The IAS–USA publishes the peer-reviewed journal *Topics in Antiviral Medicine*™ 4 to 6 times a year as a resource for physicians and other health care practitioners who are actively involved in the care of people with HIV or other viral infections. The journal offers CME credit and is indexed on *Index Medicus*/MEDLINE.

Treatment and Testing Guidelines

The IAS–USA sponsors the development of clinical practice guidelines. The guidelines are written by independent volunteer panels of researchers and clinicians from around the world and focus on management issues for which definitive evidence is lacking. Guidelines for viral load testing, antiretroviral therapy, behavioral and biomedical HIV prevention, HIV drug resistance testing, cytomegalovirus infection, and metabolic complications have been published. Recommendations on the use of antiretroviral drugs for treatment and prevention of HIV infection in adults, by the IAS–USA Antiretroviral Guidelines Panel, have been published in the *Journal of the American Medical Association*. Visit www.iasusa.org/resources/guidelines for updates.

Recommendations on the use of antiretroviral drugs for treatment and prevention of HIV infection in adults, by the IAS–USA Antiretroviral Guidelines Panel, were published in the *Journal of the American Medical Association* on October 14, 2020 (Saag MS, Gandhi RT, Hoy JF et al. Antiretroviral drugs for treatment and prevention of HIV infection in adults: 2020 recommendations of the International Antiviral Society–USA panel. *JAMA*. 2020:E1-19). *JAMA* offers free access to the paper at www.jamanetwork.com/journals/jama/fullarticle/277187. The paper includes updated recommendations for the use of antiretroviral therapy in adults with established HIV infection, including new recommendations on what regimens to start, updated approaches to prescribing preexposure prophylaxis (PrEP), new recommendations on management of aging among people with HIV, and overview of the current understanding of the intersection of COVID-19 disease and HIV.

HIV Drug Resistance Mutations

Through the HIV Drug Resistance Mutations Panel, the IAS–USA provides regular updates on the mutations associated with resistance to antiretroviral drugs. A volunteer panel of acknowledged leaders in the field collect and review the information on relevant mutations. This information, last updated in July 2019, is available in *Topics in Antiviral Medicine*[™], and on the

IAS–USA website at www.iasusa.org/resources/hiv-drug-resistance-mutations/.

COVID-19: What We Know Today. A Dialogue About the Public Health, Scientific, and Clinical Aspects of the Pandemic

The COVID-19 pandemic has created an urgent need for reliable scientific information. The IAS–USA COVID-19 Dialogues bring together 2 or more leading experts to discuss the latest science regarding COVID-19 and what the data and research are telling us about the basic science, public health, and clinical aspects of the disease, and the consequences of the pandemic.

Visit <https://www.iasusa.org/activities/covid-19-dialogue-series/> for upcoming live Dialogues. The conversations are available on-demand as webcasts and podcasts after they are broadcast at www.iasusa.org/activities/covid-19-dialogue-series/on-demand/.

Webcasts

Webcasts are recordings from our popular regional advanced-level CME courses on HIV/AIDS–related treatment issues. The webcasts enable HIV clinicians who are unable to attend the live courses, including HIV clinicians located around the world, to access clinically relevant information and learn at their own pace.

Podcasts

Many past IAS–USA activities are available as podcasts and may be downloaded from the IAS–USA website. Visit www.iasusa.org/resources/podcasts for details and a list of available presentations.

Presentation Slides

The IAS–USA offers a collection of downloadable presentation slides from various activities. Slides may be downloaded as PowerPoint files from the IAS–USA website at www.iasusa.org/resources/key-slides/.

For information about any of these programs, please visit www.IAS-USA.org.
